

Water Usage Chart

DentaPure® Cartridge DP365B: Independent water bottle cartridge DentaPure® Cartridge DP365M: Municipal cartridge

The DentaPure DP365B and DP365M cartridges are EPA registered to deliver safe, clean dental unit treatment water, with no maintenance or monitoring protocol needed for 365 days at which time, you should change your cartridge.

However, if your practice prefers to keep water usage records, the DentaPure DP365B and DP365M cartridges will treat 240 liters of water. The chart below is a convenient tool to track your water consumption. **One chart should be used per operatory.**

Instructions: Each full square represents one liter of water. Check off one full box for each liter of water consumed. When the chart is full, it is time to replace your DentaPure cartridge.
